Setting a Higher Standard

SE LABS: NI PCI, PXI & SCXI Modules CALIBRATION PROVIDER

SE Labs Standard Calibration Service - NI Basic

SE Labs provides basic calibration certificates online for new measurement products. This certificate states that the product is calibrated using procedures compliant with ISO 9001 quality requirements, meets or exceeds the NI specifications, and is traceable to internationally accepted standards.

SE Labs Commercial Calibration Service - NI Detailed

If your quality requirements state that you need more than a basic calibration certificate, SE LABS can meet your needs with its detailed calibration service. This service provides detailed measurement data in addition to the information on the basic calibration certificate.

SE Labs Calibration Service - NI Compliant

If your quality requirements require an accredited calibration on file, SE Labs can supply an accredited certificate when ever possible. This certificate states that the product has been calibrated using procedures compliant with ISO 9001:2008 & ISO/IEC 17025:2005 quality requirements, meets or exceeds the NI specifications, and is traceable to internationally accepted standards.
